

**Potential Mold Cleaning Procedures**  
**Small/Medium Area – Ceiling Tile**  
**(<100 sq. ft.)**

- ✓ Isolate the area
- ✓ Cover any furniture in the area
- ✓ Put on PPE, optional
- ✓ Remove NON-affected adjacent ceiling tile
- ✓ Check back of ceiling tile for potential mold
- ✓ Spray all affected areas with mold inhibitor and allow to dry
- ✓ Mist affected areas with spray adhesive
- ✓ Remove affected ceiling tiles and put in plastic bag
- ✓ Wipe grid railings with mold inhibitor
- ✓ Install new ceiling tiles
- ✓ Remove coverings
- ✓ Presumed mold re-appears
  - Determine source of moisture
  - Correct the moisture problem
  - Abate the new potential mold problem
